TIMBER BUYERS

of the

YAZOO-LITTLE TALLAHATCHIE WATERSHED

of

MISSISSIPPI

Sam Guttenberg
and
Joe D. Perry

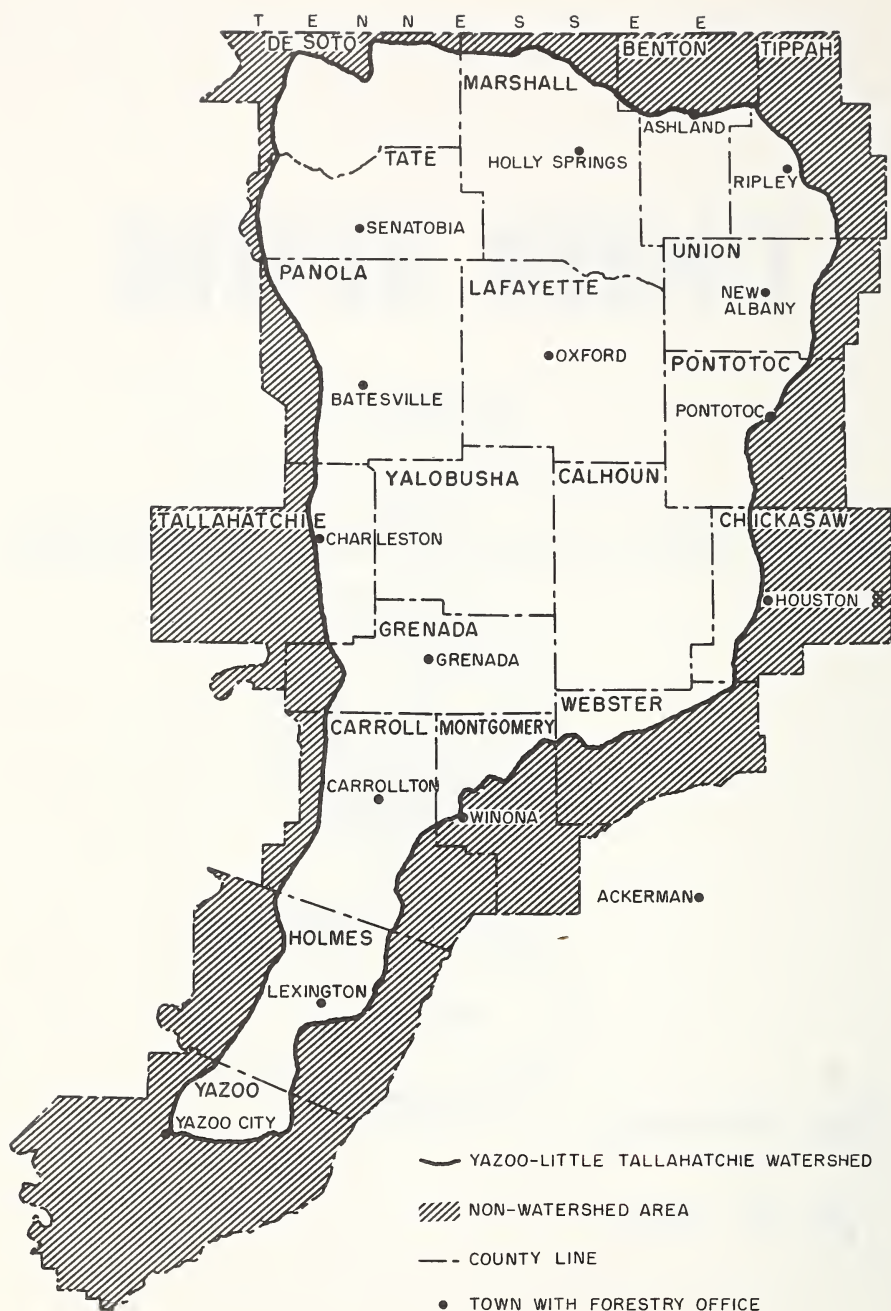

Figure 1. The Yazoo-Little Tallahatchie Watershed of Mississippi.

THIS BOOKLET IS A DIRECTORY of timber-buying firms in the 19 counties that include the Yazoo-Little Tallahatchie Watershed (fig. 1). The 273 buyers listed here were located in a county-by-county canvass by personnel of the Yazoo-Little Tallahatchie Flood Prevention Project, U. S. Forest Service, in 1958. While diligent efforts were made to locate all active buyers, some may have been accidentally missed. Omission of a firm is therefore no reflection upon its activities, nor does inclusion constitute a recommendation.

Most landowners market timber too infrequently to gain much experience in this activity. For this reason, prospective sellers would benefit from expert assistance in marking their trees for sale and in deciding on the best market. Owners of substantial amounts of timber usually obtain professional services from consulting foresters. All owners, particularly those with small tracts, can rely on some aid from U. S. Forest Service and Mississippi Forestry Commission offices listed below. Foresters in these offices will appreciate receiving information from buyers who wish to be included in the directory. They can also help landowners locate consulting foresters.

Location of Public Foresters Serving the 19 Counties of the Yazoo-Little Tallahatchie Watershed

County	Mississippi Forestry Commission offices, in—	U. S. Forest Service, in Soil Conservation Service offices, in— ¹
Benton	Ashland	Ashland
Calhoun	Houston	Houston
Carroll	Winona	Carrollton
Chickasaw	Houston	Houston
De Soto	Senatobia	Senatobia
Grenada	Grenada	Grenada
Holmes	Lexington	Lexington
Lafayette	Oxford	Oxford
Marshall	Ashland	Holly Springs
Montgomery	Winona	Grenada
Panola	Batesville	Batesville
Pontotoc	Pontotoc	Pontotoc
Tallahatchie	Grenada	Charleston
Tate	Senatobia	Senatobia
Tippah	Ripley	Ashland
Union	Pontotoc	New Albany
Webster	Ackerman	Houston
Yalobusha	Grenada	Charleston
Yazoo	Yazoo City	Lexington

¹ Service can be provided only to ownerships within the Watershed (fig. 1).

Owners wishing to do their own timber marketing can use the buyers' list directly. Such owners can benefit by obtaining bids from several buyers. If they wish to sell products such as logs or bolts, they should obtain the buyer's specifications before starting to cut. For sales of stumpage, it is especially desirable to make an agreement with the buyer before any timber is harvested, and to mark the trees that are to be sold. The following form suggests the main points to be covered in a sales agreement.

FORM FOR TIMBER SALE AGREEMENT

_____, of _____
 (I or we) (Name of purchaser) (Post office) (State)
 hereinafter called the purchaser, agree to purchase from _____
 (Seller's name)

_____ of _____, _____, hereinafter called
 (Post office) (State)
 the seller, the designated trees from the area described below.

I. Description of sale area: Township_____, Range_____, Section_____

II. Trees designated for cutting:

All trees marked by the seller, or his agent, with paint spots below stump height and at breast height.

III. The purchaser agrees to the following:

1. To pay the seller the sum of \$_____.

2. To waive all claim to the above-described trees unless they are cut and removed on or before_____.
 (Date)

3. To pay the seller for undesignated trees cut or injured through carelessness at the rate of \$_____each for trees measuring 10 to_____inches in diameter and \$_____ each for trees_____inches or over in diameter, at stump height.

4. To repair damage caused by logging to ditches, fences, bridges, roads, trails, or other improvements damaged beyond ordinary wear and tear.

5. Not to assign this agreement in whole or in part without the written consent of the seller.

IV. The seller agrees to the following:

1. To guarantee title to the forest products covered by this agreement and to defend it against all claims at his expense.

2. To grant the freedom of entry and right-of-way to the purchaser and his employees on and across the area covered by this agreement and also other privileges usually extended to purchasers of stumpage which are not specifically covered, provided they do not conflict with specific provisions of this agreement.

TIMBER SUPPLY IS MAJOR PROBLEM

Both timber buyers and sellers have problems inherited from decades of heavy cutting in the forests of the 19 counties. A 1957 survey found about half the area forested—3.2 million acres. The average forest acre contained less than 5 cords of merchantable timber, over three-fourths hardwood. Sawtimber averaged only one thousand board feet per acre; of this, about 73 percent was hardwood—chiefly low grade.

Over 90 percent of the timberland is privately owned. Farmers alone hold 60 percent of the acreage. These typically small tracts of woodland can support only limited sales of timber today, but management could easily quadruple the current average annual growth of 75 board feet per acre.

The scarcity of pine and quality hardwood sawtimber accounts for much of the huge decline in the number of sawmills. In 1946 there were 415 sawmills in the 19 counties as compared to 171 in 1958. Sawmillers and specialty wood users who are still in business say that lack of suitable timber is the chief handicap to their operations. Much of the hardwood sawtimber is difficult for buyers to handle profitably, though it will make lumber suitable for farm use. Most of the sawmills listed here will custom-saw logs.

For pulpwood buyers, the timber supply is more favorable. Pulpwood harvesting is relatively new to this area. In 1946 only 35,000 cords were purchased, but by 1956 a five-fold increase to 162,000 cords had been achieved. Purchases declined to 125,000 cords in 1958. The drop occurred partly because the pulp industry has been substituting sawmill residues for bolt wood, and partly because of the business recession. New pulpmills that are planned or already under construction will soon provide additional markets for wood. The pulpwood dealers are prepared to redouble their activities.

Eventually the sawtimber market may improve also. Each year about 50 million pine seedlings are being planted in the Watershed. Pine timber supplies are almost certain to increase.

Meanwhile, buyers seeking stumpage might also benefit by calling at the forestry offices listed above. The foresters are concerned with helping wood users as well as landowners.

GUIDE TO THE DIRECTORY

An asterisk (*) opposite a name in the directory indicates a firm that has been at its present location for less than four years. Small sawmills tend to move frequently, though they can usually be located by inquiry

near their last setting. For pulpwood buyers, asterisks frequently indicate firms that have opened business recently, rather than those that have moved. Many new pulpwood businesses have good prospects for remaining in one location for many years.

A number in parentheses in the "Products purchased" column indicates the volume of each firm's business in cords of pulpwood or thousand board feet of sawtimber handled in 1957:

Cords or 1,000 board feet

(1)	0 — 49
(2)	50 — 499
(3)	500 — 2,999
(4)	3,000 +

The coding system also is a rough index of the amount of timber a firm will buy. Firms in groups 1 and 2 will often purchase as little as 2 to 3 cords of pulpwood stumpage, or a few thousand board feet of sawtimber. Firms in groups 3 and 4 are year-round businesses and prefer somewhat larger volumes of stumpage, though most are willing to buy small lots of delivered logs or bolts.

Benton County

<i>Name</i>	<i>Address</i>	<i>Type of firm</i>	<i>Products purchased</i>
